Contents

1 Preliminaries **4**

1.1 What is Python? 4

1.2 Installation and documentation 4

2 Getting started **4**

2.1 Running Python as a calculator 4

2.2 Quitting the interpreter 6

2.3 Loading commands from the library 6

2.4 Defining functions 7

2.5 Files 8

2.6 Testing code 8

2.7 Scripts 8

3 Python commands **9**

3.1 Comments . . . 9

3.2 Numbers and other data types . . . 9

3.2.1 The `type` function . . . 9

3.2.2 Strings . . . 10

3.2.3 Lists and tuples . . . 10

3.2.4 The `range` function . . . 11

3.2.5 Boolean values . . . 11

3.3 Expressions . . . 11

3.4 Operators . . . 11

3.5 Variables and assignment . . . 13

3.6 Decisions . . . 13

3.7 Loops . . . 14

3.7.1 `for` loop . . . 14

3.7.2 `while` loop . . . 15

3.7.3 `else` in loops . . . 15

3.7.4 `break`, `continue`, and `pass` . . . 16

3.8 Lists . . . 16

3.8.1 Length of a list; empty list . . . 17

3.8.2 Sublists (slicing) . . . 17

3.8.3 Joining two lists . . . 18

3.8.4 List methods . . . 18

3.9 Strings . . . 19
